

SOFTWARE ENGINEER

GUSTAVO GUTIÉRREZ

FULLSTACK DEVELOPER

HARD SKILLS

- Software architecture (C4)
- Software design (Figma)
- Multi-language programming
 - JavaScript
 - TypeScript
- BackEnd (NestJS)
- FrontEnd (Angular JS, Angular v18 - 19, vue3.js)
- Database management
 - postgres
 - MySQL
- Version control
 - Git, GitHub, GitLab
- Agile methodologies (Scrum - Jira)
- University theoretical physics
- University algebra
- Pre-university mathematics

SOFT SKILLS

- Organization and time management
- Critical thinking
- Teamwork skills
- Initiative and proactivity
- Oratory

EDUCATION

Continuing education course

- Platzi | Udemy | Scrimba

2025 - 2026

Bachelor's Degree in Computer Science, Specialization: Software Engineering (UMSA)

2021 - 2025

Teaching assistant training course (EPA)

2023

English course (CBA)

2020

PROFESSIONAL OBJECTIVE

A **systems developer** with a background in **Computer Science** as a **systems engineer** and experience in developing web solutions using languages such as **TypeScript**, **JavaScript**, and **Kotlin**; frameworks like **NestJS**, **Angular**, and **Vue**; and database managers like **PostgreSQL**. Capable of working across all development layers, from system architecture and interface design to backend logic, frontend views, and database connectivity.

I excel by maintaining a strong focus on **code quality**, **system architecture**, and the **integration of external services** such as **APIs** and **chatbots**. Committed to continuous learning and **delivering technological solutions** that create a real impact.

PROFESSIONAL EXPERIENCE

2026 | INTERNSHIP (Kenya)

- **Momentum Collective | Momentum labs**

2025 | FULL STACK DEVELOPER

- **MDPyEP - VPI | Unidad de Gestion integrada para la Industria (UGII)**
- **Personal project | Workflow automation with n8n**
- **Personal project | Chatbot in telegram with n8n**

2024 - 2025 | FULLSTACK DEVELOPER

- **GAMLP - DTIGA | Unidad de Innovación Tecnológica y Gobierno Abierto (UITGA)**
- **Personal project | Chatbot with Meta and OpenAI**

2023 - 2024 | TEACHING ASSISTANT

- **Physics**
- **Mathematics**
- **Algebra**

LANGUAGES

English - Native or bilingual proficiency, Advanced (C1/C2)

Portuguese - Initial (A1/A2)

Spanish - Native

SOFTWARE ENGINEER

GUSTAVO GUTIÉRREZ
FULLSTACK DEVELOPER

PROFESSIONAL EXPERIENCE (TECHNICAL DESCRIPTION)

2026 | INTERNSHIP PROGRAM (KENYA)

Momentum Collective | Momentum labs

- Creation of the website "Victoria Falls Regional Institute"
 - In charge of the frontend (Angular v19)

2025 | FULLSTACK DEVELOPER

MDPyEP - VPI | Unidad de Gestion Integrada para la Industria (UGII)

- Support for the activities carried out by the Integrated Management Unit for Industry.
 - Collaboration in the implementation, improvement, and deployment of the Industrial Environmental Information System (SIAI).
 - Evaluation and improvement of Industrial Environmental Register (RAI) and other Particular Scope Regulatory Instruments (IRAP).
 - Support in the development of the SIAI, working on both the backend (**NestJS**) and the frontend (**Vue3.js**).
 - Version control using Git.

Personal project | Workflow automation with n8n

- Performed an exhaustive analysis of the n8n platform to identify and leverage its automation capabilities, implementing workflows for email dispatch.

Personal project | Chatbot in telegram with n8n and AI agents

- Development of an advanced Telegram chatbot by integrating n8n with AI models to provide contextual and automated responses.

2024 - 2025 | FULLSTACK DEVELOPER

GAMLP - DTIGA | Unidad de Innovación Tecnológica y Gobierno Abierto (UITGA)

- Design and development of the home healthcare system for the municipality of La Paz.
 - Implementation of visual prototypes in **Figma** to enhance usability and team communication.
 - System architecture modeling using **C4** diagrams and **use cases**.
 - Design and optimization of the **PostgreSQL** database, applying normalization principles.
 - Backend development with **NestJS** and frontend with **Angular (v18-19 and AngularJS)**.
 - Version control with Git.
 - Project in advanced developed phase

Personal project | Chatbot with Meta and OpenAI

- Development and integration of a conversational chatbot using Meta's developer tools.
- Implementation of the bot on WhatsApp, with scalability to Messenger, Instagram, and Threads.
- Integration of the OpenAI API for intelligent responses to specific questions.
- Automatic storage of responses in Google Sheets for subsequent analysis and tracking.

2023 - 2024 | TEACHING ASSISTANT

Universidad Mayor de san Andrés (UMSA) | Teaching assistant

- Pre-University and University Theoretical Physics, Physics I and Physics II (2023)
- Pre-University Mathematics (2023)
- University Algebra (2024)
